

June 1, 2018

To our patients,

Thank you so much for trusting us with your healthcare. We greatly value your trust and desire to honor it by providing you with access to high-quality and affordable healthcare that focuses on your needs.

I am proud of what we have accomplished since we opened in 2005. We have remained independently-owned so we can focus on how to best serve our patients. We have innovated by offering direct care plans so those marginalized by the current system can still have access to affordable primary care services. Our walk-in clinic at Sona has expanded the hours we can be available to our patients.

I am excited to have finally published my first book, *Authentic Health*. Thank you for your support of this project. Over the coming months I will be spending a substantial amount of time furthering my education. I will also be continuing to teach and speak about the importance of health for our community and our country. Because of this, my clinical schedule will be significantly reduced. Beginning July 2, 2018, I will still be seeing patients, but I will not be able to maintain the same patient volume as I have in the past.

Please allow one of my colleagues to serve you for your medical needs. Dr. Michael Curran is accepting new patients, as is Jan O'Hara, WHNP, Jennifer Winn, PA (part-time) and Benjamin Mayer, DO. I have full confidence in our team of medical providers. We really work as a team and support one another. If you feel this change in my availability will necessitate you switching to a different medical clinic, then I fully understand. I do hope you will allow our practice to continue to serve you for your primary care needs.

I have been and remain deeply blessed by the relationships I have enjoyed with my patients. I thank you for your support. I will continue to do everything I can to influence a more effective and affordable healthcare system.

With gratitude,

Gus Vickery, MD
